## PROJECTS

**DevLearn - An eLearning Platform (FYP) (11/2022 - Present)**
- The only thing that sets this project apart from **Udemy** is our **unique** UI/UX and additional **functionality**. website in the MERN stack that is dynamic and responsive I'm the **team leader** and a full-stack **MERN developer** on this project.
- To view the source code, **click here**

**Food Delivery App**
- a **ReactJS-based** responsive and dynamic website using **Firebase** as the database. Furthermore, I'm **deploying** it on Firebase.
- For a live website, **click here**
- To view the source code, **click here**

**Todo List App**
- The **Todo List** website app was developed with ReactJS and a JSON database API.
- For a live website, **click here**
- To view the source code, **click here**

**Online Blood Donation Management System**
- Java (servlet, JSP), MySQL, and the Singleton design pattern were used to create this web application. The project is for the semester.
